

ABOUT ME

B.Tech Computer Science (AI & ML) student building agentic AI systems, embedded security hardware, and full-stack applications, with a focus on secure, real-world engineering.

Bengaluru, Karnataka, India

TECHNICAL SKILLS

Languages: Python, C/C++, JavaScript, Rust

AI/ML: TensorFlow, LangChain, LangGraph, OpenCV

Web: React, Next.js, FastAPI, Node.js

Tools: Docker, Kubernetes, Git, Wazuh

Databases: SQL, PostgreSQL, MongoDB, Neo4j, Redis, ChromaDB

ACHIEVEMENTS

- 1st Place – Ignite Room (Bangalore Zonal)
- 3rd Place – National-Level Cybersecurity Hackathon
- Top 6 – Computer Vision National-Level Hackathon (RVCE)
- 4x CNR Scholarship recipient
- Best Outgoing Student of the Year – 2022

Mohammed Faizan

AI/ML Engineer | Software Developer

WORK EXPERIENCE

Research Intern Jun 2026 – Present

Center for Cloud Computing and Big Data, PES University *Bengaluru, India*

- Engineered TRISP, a real-time safety-aware routing engine for Bengaluru's 65 km^2 street network using live traffic and weather APIs.
- Designed TSA-NAMOA*, beating 5-factor literature baselines in a 600-query evaluation with 0% worst-case failures and 1.03s latency; co-authored an IEEE submission.

Junior Manager, Incoming Corporate Sector Aug 2025 – Jul 2026

AIESEC in Bengaluru *Bengaluru, KA*

- Led cold-calling outreach and market research to secure client meetings with Bengaluru startups.
- Managed global AIESEC relations, matching international applicants with corporate internships across India.

Teaching Assistant Feb 2026 – Present

PES University *Bengaluru, KA*

- **Python Programming** (Sep 2026 – Present): Design lecture slides and HackerRank coding challenges; evaluate student submissions for code quality and problem-solving.
- **C Programming** (Feb 2026 – May 2026): Taught programming fundamentals and designed quizzes/study materials to reinforce core concepts.

PROJECTS

Agentic AI SOC Analyst

Python, LangGraph, Wazuh SIEM, PostgreSQL, ChromaDB

- Built a team of AI agents using LangGraph and Wazuh SIEM that automatically review security alerts and investigate threats.
- Secured the AI pipeline against prompt injection with a layered defense system and a live dashboard blocking malicious IPs.

BharatKey – Hardware Security Key

C, STM32, USB, mbedTLS

- Built a FIDO2/WebAuthn hardware security key on an STM32F411 MCU for passwordless authentication (GitHub, Google).
- Implemented CTAP2 authentication and smart-card PDF signing via ECDSA P-256 with mbedTLS and secure flash storage.

Defect Inspection System (Edge AI)

PyTorch, YOLOv10, FastAPI, ESP32

- Architected an edge CV pipeline (ResNet-18 + YOLOv10) detecting 25 defect classes across Steel, Aluminum, and Wood, boosting micro-scratch recall by +14.2% via a custom shape-descriptor module.
- Built a low-latency FastAPI/WebSocket backend streaming live diagnostics at ~45ms/frame (22 FPS), integrated with ESP32 to trigger real-time defect-rejection hardware.

EDUCATION

PES University 2024 – Present
B.Tech in Computer Science (Artificial Intelligence & Machine Learning) Bengaluru, KA

Shaheen PU College 2022 – 2024
State Board of Karnataka – 95.88% *Bengaluru, KA*

GEM School 2021 – 2022
State Board of Karnataka – Grade 10, 97% *Bengaluru, KA*
